

JERSON HERNANDEZ

COMPUTER SYSTEMS ENGINEER | FULL-STACK DEVELOPER

Alajuela, Costa Rica

Phone: +506 6358 5318

Email: hejohc@gmail.com

Portfolio: www.jercode.com

PROFILE

Computer Systems Engineer with hands-on experience in full-stack development. Specialized in building scalable and secure web applications using agile methodologies (Scrum), managing the full lifecycle from planning to deployment. Strong focus on clean code, user experience, and effective team collaboration.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Java, C#, SQL

Frontend: React, React Native, HTML5, CSS3, Bootstrap, Tailwind CSS, Chart.js, Responsive Design, Dart, Flutter

Backend & Databases: Node.js, PHP, .NET Framework, .NET Core, ASP.NET Web API, RESTful API, JWT | MySQL, SQL Server (T-SQL), SQLite, Oracle (PL/SQL), MongoDB, Firebase

Cloud & DevOps: AWS, EC2, S3, IAM, CI/CD, GitHub Actions

AI & APIs: Claude API, AI Integration, Prompt Engineering

Testing & QA: Selenium, JUnit, Postman, Unit Testing, API Testing

Tools: Git, GitHub, JIRA, Formspre, Swagger

Methodologies: Scrum, Kanban, Agile Development

Languages: Spanish (native), English (B2)

WORK EXPERIENCE

Full-Stack Development Lead | Academia Monká (University Project) | May 2024 – May 2025

- Led a team of 4 developers building a sports management system for 500+ players, including statistics tracking, evaluations, and interactive dashboards (Chart.js).
- Implemented security architecture: encryption, SQL injection protection, single-session control, and role-based system.
- Developed a chatbot for frequently asked questions and executed full testing and QA cycle.
- Stack: PHP, JavaScript, MySQL, HTML5, CSS3, Chart.js.

Mobile Developer | Business Management App | Freelance | Jul 2025 – Feb 2026

- Co-developed a mobile application (team of 4) for business management including clients, products, billing, and invoice printing.
- Implemented multi-user authentication system with registration, login, password recovery via EmailJS, and session management.
- Designed and planned database architecture and overall application structure.
- Implemented backup and restore system using Firebase Storage.
- Stack: React Native, TypeScript

Backend Developer | AI Training API | Personal Project | 2026

- Developed a scalable REST API for workout management including routines, exercises, sessions and progress tracking using Node.js, TypeScript and Fastify.
- Implemented AI-driven routine generation using Ollama (llama3.2) with an interchangeable provider pattern, enabling easy AI backend swapping via environment variables.
- Designed secure authentication with JWT access/refresh tokens, bcrypt password hashing and role-based access control (USER/ADMIN).
- Containerized infrastructure with Docker and MySQL, managed database schema with Prisma ORM and versioned migrations.
- Wrote unit tests with Vitest and automated test execution on every push via GitHub Actions CI/CD pipeline.
- Technologies: Node.js, TypeScript, Fastify, MySQL, Prisma, JWT, Ollama, Vitest, Docker, GitHub Actions.

EDUCATION

Bachelor's Degree in Computer Systems Engineering – Universidad Fidélitas, 2025

CERTIFICATIONS

Completed

- CCNA (Cisco Certified Network Associate) – Cisco Networking Academy
- English for IT 1 & 2 – Cisco Networking Academy (Certificate por CECI / MICITT) | level B2
- Claude 101 – Anthropic

In Progress

- AWS Certified Cloud Practitioner – Amazon Web Services
- GitHub Actions & CI/CD Fundamentals – GitHub
